SUMMARY

I am a **passionate and innovative Mobile Application Developer** with a proven record of building **high-performance, user-focused apps** across **Android and iOS** platforms. Skilled in **Flutter, Dart, Kotlin, Java, React Native**, and occasionally **Node.js**, I specialize in crafting **seamless, scalable, and visually engaging mobile experiences** that merge technology with creativity.

EXPERIENCE

Software Developer (Flutter / Android Native) (3+yr)

Appspondit Infotech Pvt Ltd

06/2022 - Present Udaipur, India

A Mobile Application Development Company

- Passionate and results-driven **Senior Mobile Application Developer** with over **three years of hands-on experience** designing, developing, and deploying **scalable, high-performance mobile applications**. Adept at transforming ideas into intuitive, feature-rich products that combine exceptional performance with engaging user experiences.
- Specialized in **cross-platform development** using **Flutter and React Native**, integrating backend services through **Firebase** and **RESTful APIs**. Demonstrates a deep understanding of modern app architectures, clean code practices, and UI/UX optimization for both **Android and iOS** platforms.
- Proficient in managing **end-to-end development lifecycles** – from concept validation and prototyping to release and post-launch optimization. Experienced in collaborating with designers, QA teams, and product owners to ensure timely delivery of reliable, maintainable, and performance-driven applications.
- Successfully delivered and maintained **10+ production-grade mobile apps**, collectively surpassing **10 million downloads** across the **Google Play Store and Apple App Store**, with an outstanding **average user rating above 4.5★**. Recognized for creating impactful mobile solutions that elevate brand presence and user engagement.

Mobile Software Developer (1+yr)

Freelance.com

02/2021 - 05/2022 Udaipur, India

Independent Software Development

- Designed and developed **custom mobile applications** precisely tailored to diverse client requirements, ensuring seamless functionality, intuitive interfaces, and superior performance across **Android and iOS** platforms.
- Successfully completed **15+ client projects** on Freelancer with a **100% on-time delivery rate**, consistently meeting scope, quality, and budget expectations while adapting to varying business domains and technical stacks.
- Enhanced client business outcomes by optimizing app performance, usability, and scalability – contributing to a measurable **20–30% increase in user engagement** and improved customer retention for multiple clients.
- Maintained exceptional service standards with a **5★ average client rating** and a **95% repeat business rate**, reflecting long-term trust, effective communication, and a commitment to delivering results that exceed expectations.

Android Developer

TCG Development Pvt Ltd

09/2020 - 01/2021 Udaipur, India

Focused on Android Application Development

- Initiated IT career with a focus on **Android development**, building a strong foundation in mobile application design and coding
- Developed a **crypto-based consumer-to-consumer (C2C) and business-to-consumer (B2C) application**, successfully converting client requirements into functional features

KEY ACHIEVEMENTS

- Successful Mobile App Deployments**
Successful delivery of **10+ mobile applications** with a combined **10M+ installs** and **excellent user feedback**,
- TCS - AWS Achievements**
AWS Academy Graduate – AI & Machine Learning Foundations and TCS iON Career Edge – Young Professional (Soft Skills),
- 6K+ Follower |Professional & Personal Branding**
Built a strong **LinkedIn network of 6,000+ followers**, actively sharing insights on **mobile app development, AI, and emerging technologies**

SKILLS

Flutter	React Native	Dart	Java
Kotlin	Swift	MVVM/MVC	Firebase
REST API	Git	GetX	RxDart/RxJava
UI/UX	SQLite	CI/CD	Postman
TypeScript	Redux	Provider	GraphQL
Supabase	JSON	Figma	Android Studio
Xcode	VSCode	Play Console	JavaScript

PROJECTS

Delhi Metro Rail App (10M + Install)

Present

Delhi Metro Rail Public Navigator

- Delhi Metro Rail Public Navigator
A metro navigation app with **10+ million installs**, built with **Flutter Mobile Ads, Firebase Cloud Messaging, and canvas polylines**
- Developed a high-performance metro navigation app with over **5 million installs, built using Flutter**.
- Integrated in-app purchases, Google Mobile Ads, and **Firebase Cloud Messaging (FCM)** for monetization and user engagement.
- Built an **AI-powered voice assistant** enabling hands-free user interaction through **Text-to-Speech (TTS) and NLP**.
- Enhanced accessibility and automation, allowing users to perform real-time **actions via voice commands**.

PROJECTS

Islamic Calendar & Prayer Suite (1M+ Downloads) 2024 Short summary of your work - Built an Islamic utility app scaling to 1M+ downloads with a 4.8-star rating. - Integrated GPS and mathematical algorithms to calculate precise, real-time local prayer times. - Developed a responsive Qibla compass using the device's hardware magnetometer and accelerometer sensors. - Engineered an offline reader supporting multiple translations and smooth audio recitation streaming pipelines. - Designed interactive home screen widgets and a canvas-based tool for custom graphic quote creation.

Coachbookconnect.com and CoachBook App 03/2026 Used : Antigravity with Claude Ai Models - Admin Panel with Laravel + Flutter App Api's - Scalable coaching reservation API with timezone-aware scheduling, athlete/coach booking flows, Stripe Connect payouts, FCM - I have completed the UI redesign of all blocks starting from the About section down to the footer, as well as the Requirement Inquiry Dialog. - converting them to a premium "open style" (borderless, glassmorphic, and highly interactive) while keeping everything above the About section completely untouched.
--

7Sales App Present sales and employee management app - Features live location tracking, offline attendance logging, Bluetooth-based punch-in/out, AI face detection, and real-time data sync - Integrated AI-powered face detection and real-time server synchronization with background location tracking for seamless performance across devices. - Supports offline logging for sales and attendance, allowing users to record data even without an internet connection – auto-syncs once back online.
--

Serve-It App 01/2023 - Present Serve-It App - a service assistance app - Developed a high-performance cross-platform mobile app using Flutter, delivering seamless user experiences across Android and iOS. - Integrated Firebase Cloud Messaging (FCM) for real-time notifications and efficient service updates. - Implemented socket-based real-time chat for instant communication between users and service providers. - Applied BLoC architecture to ensure clean state management, high scalability, and maintainable code structure. - Optimized app performance and responsiveness, reducing load time and improving user engagement across multiple devices.
